Rice SWCD
Cover Crop
Incentive Program

Sign up now for the 2020 crop season!

- Rate is $30 per acre for single species, and $35 per acre for multi-species mixes (up to $105 per acre over three years).
- Must agree to a three-year installation. Does not have to be on the same field.
- Eligibility: This program is intended for farmers who have previously not used cover crops, or on farms that haven’t had cover crops planted.
- Funds are limited, so act now!

Cover crops improve soil health, protect your farm from erosion, store nutrients, and much more!

To apply for the incentive, stop in or call us at 507-332-5408.

1810 30th St. NW,
Faribault, MN 55021

The Rice SWCD is an equal opportunity provider and employer.
The Rice SWCD takes all the hassle out of establishing cover crops. We will come to your farm and apply cover crop seed for you. An air seeder delivers seed evenly between the corn rows to provide excellent coverage throughout the field. We supply the seed, equipment, and operator, so there is literally nothing you have to do except tell us which fields you want us to do! We can operate in 30-inch rows of almost any planter row setup. Ideal time to plant cover crops in corn is between the V3 and V7 growth stage.

### Fees for Interseeding

- **Custom planting of seed:** $12 per acre
- **Seed cost:** Approximately $20/acre or choose your own custom seed mix.
- **Each costumer required to refill fuel in tractor upon completion of seeding (or pay additional fee for fuel)**

For more information, stop in or call us at 507-332-5408.
